# SCORPION Wiper Blade Program

Quick Selling - High Profit Blade Program Now Available

Introducing Scorpion's High Performance All Season Windshield Wiper Blades. These revolutionary wiper blades provide an innovative multi-purpose solution that fits on most vehicles. These universal windshield wiper blades come with multiple adapters that will allow you to get the right fit for your vehicle. Scorpion's Wiper Blades provide excellent wipe quality that is comparable to all the leading brands.

Scorpion Professional Series Wiper Blades are designed for even, quiet, and long-lasting operation. Our specially crafted blades are made from the finest materials that resists weather and ultraviolet damage. The curved design applies even pressure across the entire blade creating a streak free wipe. Traditional wiper blades are prone to lifting while driving and getting blocked with ice, leaves, and snow. Our curved design protects the blade from ice, leaves, snow, and other debris while allowing it to evenly grip the windshield.

## How the Program Works:

Start-up Package runs \$399.95 and includes free shipping.

This package contains 6 each of the following blade sizes (66 blades): 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 26. Also included in the package is the wiper blade display.

## How to Re-Order Wiper Blades:

When you need to order more blades, you are required to order a minimum of 10 blades in one size. This will run \$59.95.

# Scorpion DOOR EDGE GUARDS

## DOOR EDGE GUARDS BY SCORPION

**Scorpion Door Edge Guards are a Paint Protection Film designed to prevent damage to the door edges such as chips, dings, and scratches from normal wear and tear. Once these chips appear, rust will soon follow.**

Simple and easy installation leads to protection for your vehicle.

## 25 DOOR KIT

### Description:

- \*Bends Around Curves and Contours
- \*Easy Application and Removal
- \*Weather Seal Adhesive
- \*Protects paintwork along the door edge.
- \*Helps prevent chips, knocks, scratches, etc.

## FEATURES

- Adds style and protection
- Stops Rust before it happens
- Easy to apply
- Trim or cut to desired length
- Flexible around body lines
- UV protected for long life

# Scorpion Glass Cleaner

## Key Benefits:

- > Reduce Initial Tack Time
- > Speeds Up Installs
- > Completely Adjustable

## Scorpion Glass Cleaner is Window Tint Safe.

Scorpion Glass Cleaner is a heavy-duty clinging foaming glass cleaner that lifts away the toughest soils. Scorpion Glass Cleaner has no dripping, running, or streaking.

Using our Ammonia-Free formulation, our glass cleaner cleans thoroughly, dries fast, does not require rinsing, and leaves a very fresh scent upon wipe off. Scorpion Glass Cleaner can be used to remove fingerprints, dust, dirt, smoke film, lipstick, and many other substances.

## SOLD BY CAN OR CASE

### Description:

- \*Glass Cleaner
- \*Spray On, Wipe Off, Streak Free
- \*Cleans, Restores, and Shines
- \*Use On Windows, Mirrors, Windshields, Plastics Computer Screens, Chrome, and Other Hard Surfaces
- \*Leaves No Film, Low VOC

### Product Information:

- FRESH AIR SCENT
- LOW VOC'S
- LIGHT, FOAMY MIST
- RECYCLABLE PACKAGING
- SAFE ON ALL SURFACES
- AMMONIA FREE

# Scorpion ARX Adhesive Remover

Quickly and easily remove window tint and other adhesives from glass with Scorpion ARX.

Scorpion's new formulation of adhesive remover works wonders to aid in the removal of window tint and other adhesives from glass. Scorpion ARX penetrates film and adhesives allowing them to soften up. This allows for quick removal with razor blades.

Scorpion ARX is sold in gallon quantities with 4 to a case.

## Features & Benefits:

- Aids in tint/adhesive removal
- Saves time and money
- Cuts through adhesives quickly
- Extreme performance
- Economically priced

## Scorpion XO2 Base Formulation

### Key Benefits:

- > Tough, Non-Skid Surface
- > 12 Standard Colors/Custom Colors
- > Texture Options
- > Resists most Chemicals/Solvents
- > Helps Prevent Rust
- > Lifetime Warranty

Scorpion XO2 is a three component, batch-mixed polyurethane coating system designed to be easy to apply, tough and UV resistant.

Scorpion X-O2 is a chemically engineered product that uses the best characteristics of polyurethane (aliphatic aromatic blend polyurethane has incredible strength), and when combined with our patented acrylics blend, adds ease of application and UV stability.

Scorpion X-O2 can be batch mixed in any quantity and yields excellent abrasion resistance, high tensile strength, and superior elongation and tear properties. Scorpion X-O2 performs exceptionally well in virtually all production, weather and chemical environments.

Low equipment and coating cost, along with unequaled performance, makes Scorpion X-O2 one of the most desirable coating products in the world.

Scorpion XO2 can be applied to virtually any surface including:

- Wood
- Metals
- Fiberglass
- Concrete

## Scorpion 9 Gallon Kit

PART#: CHXOK1

**Key Benefits:**

- > 9 Gallon XO2 Material Kit
- > Easy to Use
- > Reduced Cost
- > Covers 180ft<sup>2</sup>
- > Reduces Order Frequency

The 9 Gallon Kit has been the standard XO2 kit for many years. It's packed with enough material to cover 180ft<sup>2</sup> or 4 truck bed applications.

## 9 Gallons or 2 Gallons?

Which kit is right for me?

The 9 gallon kit is right between the new 2 gallon kit and the 45 gallon kit. It is the right size for applicators wanting more material at one time than the 2 gallon kit. The added benefit of buying more material is a lower cost per gallon.

If you are spraying more than 1 or two trucks at a time or smaller commercial applications, the 9 gallon kit may be the right size kit for you.

### GREAT FOR:

- Multiple applications in a row
- Larger volume customers
- Applicators needing more material

## WHAT'S IN THE 9G KIT?

### The 9 Gallon Kit Contains:

- 5 Gallons XO2 A
- 2 Gallons XO2 B
- 2 Gallons XO2 C

### MATERIAL ONLY

The 9 gallon kit does **not** come with 8001 Adhesion Promoter or Tint.

### How much tint to order:

As a general rule order 1 quart of tint per 9 gallon kit. You can also use custom automotive pigment from your local paint supplier. For custom colors, contact Scorpion Technical Support.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Clowardale, IN 46120  
800 483 9067  
[scorpioncoatings.com](http://scorpioncoatings.com)

## Scorpion 45 Gallon Kit

PART#: CHXO45

### Key Benefits:

- > 45 Gallon XO2 Material Kit
- > Easy to Use
- > Reduced Cost
- > Covers 900ft<sup>2</sup>
- > Reduces Order Frequency

The 45 Gallon Kit is designed for larger volume applicators. This kit contains enough XO2 material to cover 900ft<sup>2</sup> or 16 truck bed applications.

## 45 Gallons or 9 Gallons?

Which kit is right for me?

If you are considering this kit, you probably are looking at a higher volume of applications. This kit will reduce costs for both material and shipping costs. Possible users are higher volume accessory or body shops, dealerships, or commercial applicators.

By ordering 45 gallon kits, XO2 square footage costs go down to \$2.81. That is a 6% decrease compared to the 9 gallon kit.

### GREAT FOR:

- Large volume customers
- Applicators looking to cut costs further
- Applicators wanting to reduce order frequency

## WHAT'S IN THE 45G KIT?

The 45 Gallon Kit Contains:

- 25 Gallons XO2 A
- 10 Gallons XO2 B
- 10 Gallons XO2 C

### MATERIAL ONLY

The 45 gallon kit does **not** come with 8001 Adhesion Promoter or Tint.

### How much tint to order:

As a general rule order 5 quarts of tint per 45 gallon kit. You can also use custom automotive pigment from your local paint supplier. For custom colors, contact Scorpion Technical Support.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800.483.9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion 8001 Adhesion Promoter

## Key Benefits:

- > Creates Chemical Bond
- > Easy To Apply
- > Quick Drying
- > Includes Spray Nozzle

Scorpion 8001 Adhesion Promoter grips a prepped surface and improves XO2's adhesion to the surface.

Scorpion 8001 is one the keys to a great application. XO2 can be applied to virtually any surface as long as it has something to hold on to. For painted surfaces, scratches are created in the clear coat and then cleaned. These scratches provide an area for 8001 to "bite" into and create one half of the bond. XO2 has been engineered to adhere to 8001.

You get the best of both types of bonds - mechanical and chemical. This process is the only true way to get a seamless, watertight coating that prevents rust and corrosion.

Available in quart and gallon pricing

Scratches are made to the surface creating areas for 8001 to grip.

Applying a light mist coat of 8001 is all XO2 needs to get a great bond

## Application Method:

### Painted Surfaces and Fiberglass

After a painted surface has been properly prepped and cleaned, apply a light mist coat from the spray nozzle. Do not allow the 8001 to pool or run. If this is happening, you are applying too much 8001. If 8001 does pool, simply soak up the excess with a clean cloth

Let the 8001 Adhesion Promoter sit until tacky. This is usually about 15-30 minutes under normal conditions. After this period, you can then mix and apply XO2.

## Application Method:

### Bare Metal Surfaces

Bare metal surfaces need an appropriate primer before using 8001 Adhesion Promoter. Once a primer has been applied properly, a light mist coat of 8001 can be used to bond to the primer.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800 483 9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion XO2 Accelerator

## Key Benefits:

- > Reduce Initial Tack Time
- > Speeds Up Installs
- > Completely Adjustable

Scorpion is the first and only spray-on truck bed lining company to offer a completely adjustable tack time system.

Scorpion applicators have long enjoyed to 30 minute set time because it allowed them to use regular masking tape as opposed to very expensive, hard to use wire tape for prep. In addition, a 30 minute set time allows the applicator to obtain special textures and finishes.

Most Scorpion applicators have noted a 40% increase in volume, thus they want to turn out more trucks per day. Also OEM and outdoor applications have risen dramatically.

Scorpion Accelerator was introduced to address these needs. Now, Scorpion applicators can go fast and use Accelerator.

- Reduces Tack Time up to 40%
- Turn Out More Volume Faster
- Completely Adjustable

Available in quarts and gallons.

## Typical Mixture:

4 oz Max Per Large Batch/Gallon

Add up to 4oz per large batch or gallon kit during the mixing process. This will provide up to 40% reduction in initial tack time. You may use less, but never more than the maximum amount.

NOTE: Adding accelerator to your batch or kit will decrease pot life. Be sure you are ready to apply XO2 when using accelerator. Not recommended for use with the EG570 electric sprayer.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800.483.9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion DTM Etching Primer

## Key Benefits:

- > Creates Chemical Bond
- > Works on Bare Steel
- > 2 Part Mixture
- > Strong Etching Primer

Scorpion DTM Etching Primer creates a bonding surface on bare, hardened steel applications.

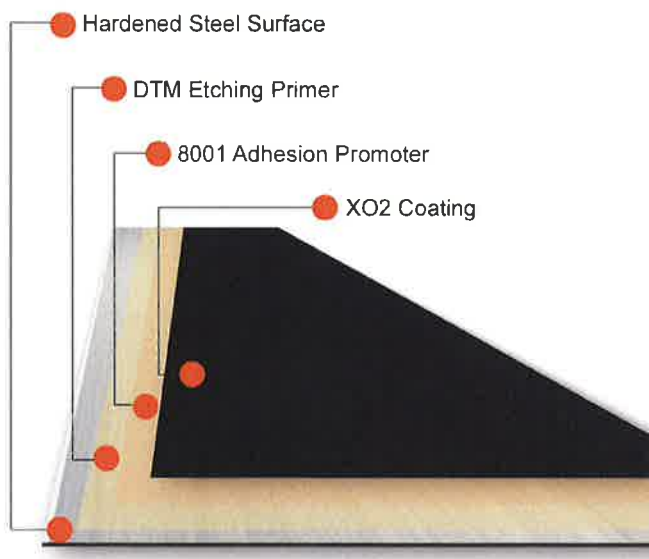

When working with bare hardened steel, 8001 alone cannot create a great bond. For the best bond we need something that will "bite" into the metal and provide a surface that 8001 can adhere to.

DTM solves this problem. It is a strong etching primer rated for hardened steel. DTM is a two part etching primer consisting of part A, and part B.

For aluminum and other metals, use an appropriate etching primer rated for that specific metal.

## How it works

## Application Method:

### Bare, Hardened Steel

As with all Adhesion Promoters, DTM is best applied in one, very thin, pass, normally 1 ounce per 10 square feet. DTM is sold in 2 quart sets containing 1 quart of DTM "A" and 1 quart of DTM "B". Mix at a rate of 1:1. Once mixed DTM has usable pot life of one hour.

DTM is normally dry to the touch in one hour. It must be dry to apply the 8001. DTM is best applied using a hvlp gun. Clean up with mineral spirits or lacquer thinner. Discard unused, mixed DTM Adhesion Promoter.

The DTM primed surface must be topped with 8001 and the Scorpion coating applied within 24 hours of the initial DTM application for best results.

Do not apply Scorpion X-O2 directly to the DTM Primer. It is intended to act as a bonding agent between 8001 and the bare metal.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800 483 9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion Gripper Granules

## Key Benefits:

- > Aggressive Non-Skid Surface
- > Adds Texture
- > Rough to the Touch
- > For Extreme Grip Applications

Scorpion Gripper Granules added to XO2 will give you an extremely aggressive texture in areas where an aggressive, high traction finish is required.

This is another texture additive that increases surface texture. Gripper Granules are hard coal slag granules added to XO2 mix to create extreme grip. It is an ideal additive for loading ramps, step bumpers, etc.

A key note about Gripper is the application process. Gripper is a heavy media that will sink if mixed into and sprayed in a normal batch. Gripper is mixed and sprayed as a top-coat that will nestle into the product as it cures.

## Applications include:

Trailer Ramps/Floors, marine applications  
steps, high traffic areas

### 50% Rubber/Gripper Load

### 25% Rubber/Gripper Load

#### LARGE BATCH

B*	CATALYZER	COLOR	A	Rubber/Gripper	TOTAL MIX
1 QT	1 QT	1/2 CUP	2.5 QTS	625 QT (20 OZ)	5.25 QTS

## Mixing and Spraying a Gripper Granule Application:

Gripper Granules is a two-step application. Apply a base of XO2 at 50-55 mils. Allow this base to tack over for at least 45 minutes @ 70°F. Once the base has tacked over, mix an appropriate size batch of the XO2 with the Gripper Granules from the chart on the left.

Apply this batch as a texture coat for a uniform Gripper Granule finish.

Do not over mix. You have a 20 minute pot life once the "A" component touches the "B". If you mix for longer than one minute you can reduce this pot life considerably.

All pot life times are based on 70°F. Higher air or material temperatures will reduce pot life time.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800.483.9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion Prime Bond Cleaner

## Key Benefits:

- > High Quality Cleaner
- > Fast Drying
- > No Residue
- > Includes Pump Sprayer

Scorpion Prime Bond Cleaner is an excellent pre-paint cleaner that is fast evaporating and does not leave behind any residue.

One of the most important keys to a quality XO2 application is a clean surface. After scuffing a surface with a cup brush, you are left with debris and dust. Leaving this behind will block the adhesion powers of 8001 creating weaknesses in the coating bond.

We suggest using Prime Bond Cleaner. Prime Bond Cleaner is a fast evaporating, high quality pre-paint cleaner. It dries quickly and will not leave behind any residue.

## Cleaning Process:

Using the supplied pump sprayers, mist a liberal amount of Prime Bond Cleaner on to the surface. Work in small sections as this is a quick evaporating cleaner.

Wipe down wet areas constantly rotating the cloth's surface. Prime Bond Cleaner will dry very quickly and you will be ready to use 8001 Adhesion Promoter.

Scorpion Protective Coatings, Inc.  
6184 S US HWY 231  
Cloverdale, IN 46120  
800.483.9087  
[scorpioncoatings.com](http://scorpioncoatings.com)

# Scorpion Black Rubber Crumb

## Key Benefits:

- > Aggressive Non-Skid Surface
- > Adds Texture
- > Increase Square Footage Yield
- > Not Abrasive to Skin

Scorpion Rubber Crumb is a great way to add more texture to XO2 while increasing the square footage coverage of an application.

Scorpion Rubber Crumb is the perfect additive for floor coatings where water or slick areas are present and you need extreme non-skid properties.

It is made from recycled rubber that is ground into small "crumbs". Ground rubber is lighter than the sand or quartz mix so it stays suspended in the coating through the application process so that you don't have to constantly remix your coating to keep it consistent. It is also a "soft" texture additive that provides traction but is not abrasive.

## Applications include:

Trailer Ramps/Floors, decks, loading docks, work/service truck bodies

## Mixing and Spraying a Rubber Crumb Application:

To help with cleaning and reusing mix containers, put the "A" component in last for the standard mix. Pour in the "B", Catalyzer, Color and the "A" component. Mix until the Catalyzer (white material) blends in (about 30 seconds). Then add the Rubber Crumb and mix until granules are evenly dispersed with a high-speed drill and mix paddle before putting into the spray hopper. Do not exceed a total of one-minute mix time or you will dramatically reduce pot life.

When spraying the 50% Rubber Crumb mix, set your air pressure at 40-45 PSI with the air trigger at rear of gun. Use 1/4 to 1/3 trigger to get a uniform finish. Do not over-trigger the gun.

# Scorpion Vinyl Flattener

## Key Benefits:

- > Semi-Gloss Finish
- > Reduces Shine for Non-Reflective Surfaces
- > Increases Material Hardness
- > For Interior and Exterior Finishes

Scorpion Vinyl Flattener is a revolutionary product that when added to XO2 hardens the material while reducing the sheen.

Scorpion Vinyl Flattener boosts the durability of your application while delivering a custom semi-gloss or matte finish that can be difficult to achieve with traditional protective coatings.

It's perfect for applications that require a full strength, non-reflective coating. The biggest advantage of our Vinyl Flattener additive is its ability to increase the hardness of Scorpion XO2

Available in quart, gallon and 5 gallon quantities.

- ▶ **Increases Shore Hardness up to 10 Points**
- ▶ **Reduces Sheen Giving XO2 a Semi-Gloss Appearance**
- ▶ **Duplicates the Look and Feel of Polyurea Applications**
- ▶ **Can be Used for Interior or Exterior Applications**

## Typical Mixture:

1 Quart Vinyl Flattener per Large XO2 Batch

The urethane/acrylic combination of XO2 offers a more rubberized coating which provides extreme non-skid properties but is pliable if applied with enough thickness. XO2 offers a Shore Hardness of 82 Points Type A, giving it a hardness that exceeds an automotive tire tread by about 20 points. With a full batch of Vinyl Flattener you will see an increase to a 92 Point Type A Shore Hardness, which delivers maximum protection against nicks, dents, scratches or any other accident that might damage your vehicle's perfect finish.

XO2 with Vinyl Flattener can duplicate the look, feel, and hardness of polyurea bed liners. This is a great option for operations wanting versatility in a coating product.

# Scorpion Rubberized Undercoating

## Key Benefits:

- > Rubber-Base Undercoat
- > Sound Deadener
- > Will not Dry-Out, Crack, or Peel
- > Paintable

Scorpion Rubberized Undercoating is a paintable, rubber-based undercoat for undercarriages.

Customers need the right coating for the job. Scorpion Rubberized Undercoating is designed to protect undercarriages from the harsh abuse of day to day operations. Our paintable formula dries quickly and protects against rust. This product also does not contain asbestos or asphalt.

Another great quality of Scorpion Rubberized Undercoating is the sound deadening properties. Not only will this product protect undercarriages from damage but will also reduce road noise.

## Sold In:

**5gal**

**\$50 per gallon**

**55gal**

**\$44 per gallon**

## BENEFITS:

- Heavy Duty
- Excellent Sound-Deadening Properties
- Will Not Dry-Out, Crack, or Peel
- Paintable
- Quick Dry Formula
- Protects Against Rust

### Preparation:

*Remove loose paint, rust, oil and grease prior to application. Then clean with a quality pre-paint cleaner.*

### Application:

*Distance: 6"-9"  
Flash Time: 5 minutes  
Coats: 2-3 medium wet  
Paintable: 30 minutes @ 70°F*

## Al's Liner Professional Series Application Tools

To get a quality application you need the right tool. Al's Liner offers two application tools to get the job done: Al's Liner Spray Gun and the Al's Liner Brush and Roller Kit.

NOW IN **BLUE!**

### ◀ The Al's Liner Spray Gun:

With its special 5-point spray texture nozzle, this gun will maximize the durability of your Al's Liner Kit while allowing a customized texture and thickness to match any finish you like. With a simple air regulator, you can adjust the air pressure and achieve a variety of textures. The Al's Liner Spray Gun also has an adjustable trigger pull mechanism that allows you to set the maximum amount of trigger you can pull wherever you like it. It is easy to clean and disassemble for a simple and hassle-free job.

#### Features:

1.25 Gallon Hopper • 3 Orifice Configurations • 5-Point Texture Nozzle

### ◀ The Al's Liner Brush and Roller Kit:

Great for tight areas, interior sound deadening, custom visual applications and much more. The Al's Liner Roller/Brush Kit includes one three inch brush, two four inch rollers, roller assembly and one paint tray. With the shed resistant woven rollers, you can apply up to a 15mil or 1/64th of inch coating in a single pass. We recommend two coats for maximum durability.

#### Features:

3" Application Brush • 2 - 4" Shed Resistant Rollers  
Roller Assembly • Paint Tray

## Al's Liner Professional Series Nylon Bristle Cup Brushes

A well prepared surface is the key to achieving a long lasting and durable coating with your Al's Liner Truck Bed Lining.

Works on all surfaces including:  
Metal, Wood, Aluminum, and  
Plastic Surfaces

◀ ARBOR: 5/8"

◀ MAX RPM: 6500

◀ DIAMETER: 4" OR 6"

▲ FILAMENT: NYLON/SILICON CARBIDE

To help you get a perfect preparation done easily every time, we developed the Al's Liner Cup Brush, a professional series abrasive nylon bristle cup brush. Its tough nylon bristles do a fantastic job sanding, scuffing, and blending surfaces.

The Al's Liner Cup Brush attaches to a pneumatic rotary tool and will speed up the sanding time on your next project while ensuring that your surface is properly prepared.

### Key Benefits

- > Easy To Use
- > For All Surfaces
- > Non-Sparking
- > Will Not Clog
- > Long Lasting
- > Speeds Up Prep

For RV, Marine & Automotive Vehicles

# Al's Liner Professional Series HNR - Heat and Noise Reducer

Al's HNR can be applied with a brush, roller or spray guns including the Al's Texture/Spray Gun, HVLP with 3mm spray nozzle and undercoating guns

Al's HNR, is proprietary blend of latex synthetic polymers. It contains acrylic, PVA and vinyl styrene and reinforced with ceramic micro spheres that provide incredible insulation, heat reflection and sound deadening properties.

HNR can withstand up to 500F and reflects exterior temperatures by 45°F or more. HNR can be applied to virtually any substrate with minimal prep, works just like latex paint. Excellent for interior automotive applications of all types! Al's HNR keeps your vehicle or boat cool in the summer and warm in the winter.

## What Does HNR Do?

Reflects Exterior  
Temperatures by 45°+

Reflects Sound

AL'S HNR

Blocks 35%  
Solar Energy

SURFACE

## Key Benefits

- > Blocks up to 35% of exterior heat/solar energy from transferring through substrate
- > Only requires a 31 mil wet coat to achieve maximum heat reflection - covers up to 44 ft2 per gallon
- > Can be applied with spray guns, brushes and rollers
- > Another green effort from Al's - Made of 100% recycled latex polymers
- > Cleanup is easy - No solvents needed just need soap and water

## Al's Liner Shake & Shoot DIY Bed Liner Kits

Shake & Shoot is a 2 part urethane protective coating that can be used in a variety of applications including: auto, commercial, and residential. It has excellent UV, abrasion, and chemical resistance properties. See data sheet for details.

Al's Liner Shake & Shoot is a urethane truck bed liner coating designed to protect surfaces from rust and abuse. These kits are available in 3 colors (black, white, and tintable) and applied using an inexpensive undercoating gun.

### Key Benefits

- Easy to install
- 1 Gallon kit
- Save Time and Money
- Black, White, & Tintable
- Custom Colors
- Custom Textures

\*A roller kit is also available.

Pictured Part #: ALS-SNSK

#### TECHNICAL DATA

Color:	Black/White/Opaque
Mix Ratio:	3:1 (Tintable requires-3 oz. of color)
Dry Time (Air Dry):	4 - 6 hours
Dry Time (Force Dry):	30 minutes @ 120°F
Pot Life:	60 min. @ 72°F/22.2°C, 50% RH
Shelf Life (Unopened):	12 months

#### GUN SETUP (UNDERCOATING GUN)

Air Pressure:	60 – 80 psi

ALS-SNST	-	Shake & Roll Tintable 1 Gal Kit with Roller & Brush

## Scorpion Truck Bed Liner High Pressure Systems

### Key Benefits:

- > Hybrid Coating System
- > Easy To Use
- > High Pressure Polyureas
- > Short Tack Free Time
- > 100 % Solids - Zero VOC
- > Tough and Durable

Scorpion High Pressure Systems are 100% solids, contain zero VOC and are quick to dry and easy to use.

The Scorpion High Pressure Systems are fast setting polyurea spray systems for our unique aromatic and aliphatic polyurethane formulations. The systems are easy to use and has a tack-free time as short as 6 seconds. They are 100% solids and contain zero VOCs.

Scorpion supplies a complete lineup of high pressure polyurea systems including:

Scorpion Green - Soy Based Hybrid Polyurea  
 Scorpion Aromatic - Extremely Tough Polyurea  
 Scorpion Aliphatic - UV Stable Polyurea  
 Scorpion Gel - Slow Tack Time for OEM Applications

The Scorpion High Pressure Systems are 100% Solids, contains Zero VOCs and tack-free times as short as 6 seconds.

Scorpion Applications include but *not* limited to:

- Truck Beds
- Wheel Wells
- Fender Flares
- Rocker Panels
- Tool Boxes
- Trailers
- Utility Beds
- Boats
- RV/ATV/UTV
- OEM Applications

## Scorpion Aromatic Cartridge System

### Key Benefits:

- > Hybrid Coating System
- > Easy To Use
- > Quick Change Cartridges
- > Tack Free in 6 Seconds
- > 100 % Solids - Zero VOCs
- > Tough and Durable

The Scorpion Aromatic Cartridge System is quick drying, 100% solids and contains Zero VOCs. Performance and durability for truck bed liners.

The Scorpion Aromatic Cartridge System is a fast setting cartridge spray system. This system is an easy to use quick cartridge system and has a tack-free time of 6 seconds, are 100% solids and contain zero VOCs.

The Aromatic Series offers performance and durability of a polyurea at the price of a hybrid. Great for any applications requiring high tensile strength, cut and abrasion resistance and overall toughness.

The Scorpion Cartridge System is 100% Solids, contains Zero VOCs and is tack-free in 6 seconds.

Scorpion Applications include but **not** limited to:

- Truck Beds
- Wheel Wells
- Fender Flares
- Rocker Panels
- Tool Boxes
- Trailers
- Utility Beds
- Boats
- RV/ATV/UTV

## Scorpion WB250 Waterborne Urethane

Residential & Commercial Protection

### Key Benefits:

- > Abrasion Resistance
- > UV Resistance
- > Can Be Tinted
- > High Gloss
- > No VOC - Low Odor
- > Applies To Most Surfaces

Scorpion WB250 is a color stable, waterborne urethane used for coating and sealing a multitude of surfaces and/or existing coatings.

Scorpion Waterborne Urethane is designed to add a layer of protection that is both abrasion and chemically resistant. WB250 also displays high levels of UV stability, meaning it will hold it's color.

WB250 can be applied clear or can be tinted using standard household water-based paint. A perfect coating for the home including but not limited to decks, patios, docks, furniture, and concrete applications.

This coating is ideal for any area where a thin mil, Zero-VOC, abrasion resistant coating or sealer is required.

Low equipment and coating cost, along with unequaled performance, makes Scorpion's products some of the most desirable in the world.

### Scorpion WB250 Product Advantages:

- Easy to Apply
  - Zero VOC
  - Low Odor
  - Abrasion Resistance
  - Chemical Resistance
  - Applies to virtually any surface

**BODYFENCE**  
PAINT PROTECTION FILM

## Paint Protection Film

### Product Specifications

POLYURETHANE FILM 4 MIL 155 MICRONS (GLASS) 100 MICRONS (MATT) PET LINER

WITH

### Chipping-Resistant

There are a million causes of paint damage from stones and gravel to road debris. Resist the impact from these every day road hazards with BODYFENCE.

### Self-Healing

Should your paint become scratched, the BODYFENCE protective film will regenerate with the help of heat from the sun or hot water.

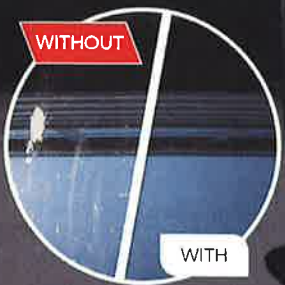

Scratches appear on the car body when using automatic mechanical car wash brushes, when rubbing against bushes on road sides, during everyday use or due to an act of vandalism.

All these scratches will disappear from the surface of the protective BODYFENCE film thanks to the heat of the sun or just rinsing with hot water. Your original paint is preserved.

### Ultra-Transparent

The BODYFENCE protective film is a highly transparent film developed to protect the vehicle without altering its appearance. This film is available in both gloss and matt finish. Matt version will make any paint or gloss film matt.

### Self-Cleaning

The BODYFENCE protective film contains an anti-adhesion component. Thus, dust and dirt will adhere much less to the car body. Cleaning will be less frequent and significantly easier.
